PACKAGING SOLUTIONS

ENG

OUR PRODUCTS

PRIMARY PACK

- Print wrappers for sachets / stick packs
- Retroblister aluminum print

The procedures adopted for the production of materials and objects intended to come into contact with foods called "MOCA" (primary packaging), follow a correct application of Good Manufacturing Practices (GMP) through a system of Quality Assurance, Quality Control and implementation of drafting and archiving of operational documents, maintaining the complete traceability of the activities carried out..

Q.ty → 31.100.000 year u.s.

TECHNOLOGY AND METHOD

Equipped with an extremely flexible structure, we adopt standards in line with the needs of the most demanding companies to supply high quality products.

DYNAMICITY and **VERSATILITY** characterize the service allowing us to offer different packaging solutions and to propose ourselves as the only point of contact to reduce costs and guarantee a complete service. Finally, **QUALITY** is the main pillar on which all processes, procedures, controls and safety measures are based.

From graphic design to printing, up to the finished product, we play a **360°** support role.

The large degree of customization for your ideas or proposals to customers in terms of packaging, allow us to supply an exclusive product, differentiable from competitors and made with extreme attention to the environment and the materials used.
